- OPTIONS** Available in White, Blue, Green, Red, and Orange.

Crystal lights

SL Crystal 8021X4

DESCRIPTION

The crystal lights are a versatile Led light fitting with a high total all round light output. It is a slim design for low space areas and the prismatic cover disperses the light effectively without absorbing much light in the process. The light has a classic design to fit any environment.

APPLICATIONS

The light is ideal as a cupboard light, under cupboard light and in all areas where head height is of concern such as campervans, motor homes boats, and any where that power availability is of concern as the light has a very high light output for a low current draw and was designed with solar applications in mind. Such as for remote areas or villages or homes in areas with intermittent power supplies, who use battery back up, or homes that are on solar or wind power.

DIMENSIONS

86mm by 86mm by 33mm high.

TECHNICAL

12 -14 volt AC or DC with 8 generation 7 SMD Led's with 160 degree light dispersion and a total power usage of less than 5 watts (100miliamps).

OPTIONS

With or without on off switch built in, available in white or warm white or blue.
